- Immerse into the practical colour change techniques.
- This seminar is an essential pre-learning seminar for those looking to progress to the Master Colour Programme.

LIGHTENING RECIEPIES

- ✓ Cleansing Rinse
- ✓ Mild Lightener
- ✓ Koleston Perfect 10/0
- ✓ Illumina Color 10/
- ✓ Blondor
- ✓ Blondor Freelights
- ✓ Magma by Blondor

CLEANSING RINSE

- ✓ Quick colour correction on the same day as the colour service/treatment.
- ✓ Remove an overload of colour.
- ✓ Remove an overload of pigments directly after a high lift colour.
- ✓ Remove intensity of direct dyes.

CLEANSING RINSE

- ✓ Mix Blondor Multi Blonde Powder or Granules with warm water to a pouring consistency (can be 1:2 or 1:3).
- ✓ Apply at the basin directly after colour has been rinsed, the residual amount of oxidation in the hair will help to slightly lift the chosen areas.
- ✓ Rinse, shampoo & Anti-Oxy the hair.
- ✓ If needed use Color Touch or Color Fresh to tone.

MILD LIGHTNER

- ✓ The primary technique for colour correction, removal of old colour, dark & heavy bands of colour, removal of an overload of pigments.
- ✓ A lift up to 2-3 levels can be achieved.

MILD LIGHTNER

- ✓ Mix Blondor Multi Blonde Powder or Soft Blonde Cream with Welloxon Perfect Pastel Developer in a 1:4 mixing ratio.
- ✓ Apply on dry hair using a brush on the chosen areas.
- ✓ Work into the hair & leave for maximum 30 mins.
- ✓ Rinse, shampoo & Anti-Oxy.
- ✓ Dry the hair & apply your chosen colour.

KOLESTON PERFECT 10/0 ILLUMINA COLOR 10/

- ✓ Ideal when lightening darker patches or bands of over-lapped colour.

KOLESTON PERFECT 10/0 ILLUMINA COLOR 10/

- ✓ Mix 1pt Koleson Perfect 10/0 or Illumina Color 10/ + 1 pt Welloxon Perfect 12%
- ✓ Apply only where necessary.
- ✓ Develop up to 30 minutes with heat (Climazon).
- ✓ When sufficient lift has been achieved (warm exposed) remove leaving approx 20% residue on the hair.

DARKENING RECIPIES

PRE-PIGMENTATION METHODS.

If a client wants to colour a bleached or over-highlighted hair darker with a fashion shade a pre-pigmentation is recommended for the use of Koleston Perfect & Color Touch.

3 different ways for pre-pigmentation;

- ✓ Using Perfecton by Color Fresh
- ✓ Using Koleston Perfect Special Mix 0/43
- ✓ Using Color Touch for Color Touch only = Filling

PERFECTON BY COLOR FRESH

- ✓ Recommended shades - /3, /44, /43
- ✓ 20 mls Perfecton + 40ml warm water
- ✓ Apply on dry hair using a sponge & leave for approx 10-15 minutes.
- ✓ Dab off the excess product using a tissue or dark towel.
- ✓ If needed dry the hair with a hairdryer, cool temperature.
- ✓ Apply chosen colour on top.

KOLESTON PERFECT SPECIAL MIX 0/43

Pre-pigmentation using Koleston Perfect Special Mix 0/43; for achieving **rich, fashion shades** on an 8/- depth and darker.

This Special Mix tone can be used because of the high amount of direct dyes contained & needed for pigmentation.

- ✓ Mix 15ml Koleston Perfect Special Mix 0/43 + 60ml warm water.
- ✓ Mix well to achieve an even & blended consistency.
- ✓ Apply with brush or sponge on dry hair.
- ✓ Leave for 10-15 minutes without heat.
- ✓ Rinse & dry the hair, before applying chosen colour

COLOR TOUCH “FILLING”

2 step process when going darker using Color Touch.

- ✓ Excellent for extreme porous hair.
- ✓ Determine the target depth. Find the recommended formula for your first step using the Filling Chart.
- ✓ Always mix 1 part Color Touch + 2 parts of Color Touch Emulsion 1.9%.
- ✓ Apply to pre-shampoo'd, towel dried hair.
- ✓ Develop up to 20 minutes.
- ✓ When desired results are achieved, rinse until the water runs clear, towel-dry & the apply your chosen target shade in the normal way.

KOLESTON PERFECT PIGMENT LOCK

BACK TO NATURAL COLOUR.

- ✓ Tired of bleached, high lift colour or over-highlighted hair?
- ✓ The following method of “Pigment Lock” is an amazing opportunity to go back to natural colour & ensure a perfect base for a new tone.

Benefits:

- ✓ The natural colour at the roots will not be changed.
- ✓ Pigment Lock gives a natural healthy looking result.
- ✓ Amazing long-lastingness of the colour.
- ✓ “Pigment Lock” works in 2 steps with a special proven recipe.

PIGMENT LOCK – STEP 1

- ✓ 3 parts warm water +1 part Koleston Perfect.
- ✓ Apply to towel dry hair & distribute well by using a comb.
- ✓ Leave it for approx 20 minutes.
- ✓ The most important criteria of success is the colour choice
- ✓ Always use your Koleston Perfect shade 1 or 1.5 levels darker than your target shade.
- ✓ Only take pure natural shades /0 or /00 in combination with Intensive Brunette /77 shades, a /7 can also be used

PIGMENT LOCK – STEP 2

Apply the same quantity of Welloxon Perfect Pastel developer as your colour mix directly on top of the colour mix.

Example:

- ✓ Target colour: 6/0 Dark Blonde
- ✓ Colour Choice: 2.5pt (25g) 5/0 + 0.5pt (5g) 5/77, a /7 Brunette tone can also be used.
- ✓ Mix with 3 parts of water (90ml)
- ✓ Apply on pre-shampooed, towel dried hair
- ✓ Note: the more water / moisture is left in the hair the more diluted the colour will be.

PIGMENT LOCK – STEP 2

Example (continued)

- ✓ Apply colour mix with an applicator bottle; leave the natural hair colour parts free.
- ✓ Leave it for about 20 minutes. DO NOT RINSE!
- ✓ Apply 120ml Welloxon Perfect Pastel (same amount as colour mix), evenly through the hair, comb through & leave for about 30 minutes.
- ✓ Rinse thoroughly & give one light shampoo.
- ✓ Use post colour treatment e.g. SP Color Save Emulsion, Wella Care Service Colour Post Treatment, Blondor Seal & Care.
